

# EnviroCentre - Environmental Policy

August 2006

EnviroCentre is proud of its commitment to promoting sustainability through provision of a professional environmental consultancy service.

EnviroCentre strives to provide effective environmental management and research services that facilitate sustainable business practice in all of our core business areas: Waste and Resource Management; Environmental Monitoring; Water & Fisheries Management; Environmental Assessment & Auditing; Development & Engineering Support; Contaminated Land, and Environmental Education.

By providing advice and information to our clients on new technologies and applications that help solve environmental problems, EnviroCentre plays an active role in supporting and encouraging clients in reducing their environmental impact.

**We intend to reduce our environmental impact and work towards sustainability by implementing the following steps:**

- Comply with, and endeavour to exceed, the requirements of all relevant environmental legislation,
- Establish periodic reviews of environmental impacts associated with company activities,
- Identify and implement a continuous programme of measures to minimise identified environmental impacts, and
- Involve all employees in development and implementation of our environmental action plan.

Through the processes of identification and review of environmental impacts, EnviroCentre is committed to improve significant impacts as a matter of priority.

Previous general office procedure commitments we have focused on include reducing consumption of resources by:

- Use of e-mail for all correspondence, where possible,
- Double sided printing, reuse of scrap paper, and segregation of paper waste for recycling,
- Switching off electrical appliances when not in use (monitors, photocopiers, etc.),
- Recycling printer toner cartridges, and
- Car sharing for site visits and meetings.
